ABOUT ME

I'm a full-stack developer focused on frontend, with more than 4 years of experience. I mostly work with React, Next.js, TypeScript and Tailwind CSS, and build mobile apps in Flutter. On the backend I've worked with Node.js, ASP.NET and PostgreSQL. I design my own user interfaces in Figma. Until August 2026 I developed web and mobile apps at Smartgis, where I also worked with clients on projects from requirements analysis to delivery. I'm now finishing my master's degree in Applied Computer Science at Palacký University Olomouc – I've passed my state exams and defend my thesis in January 2027. I'm looking for a frontend developer role.

SKILLS

Programming languages	JavaScript, TypeScript, HTML, CSS, Python, SQL, Dart, C#
Frameworks & libraries	React, Next.js, Node.js, Express, Flutter, Tailwind CSS, ASP.NET, WordPress, Puppeteer
Tools & technologies	Git & GitHub, npm, VS Code, Postman, Docker, PostgreSQL, Prisma, Vercel, SmartEmailing, Cron
UI/UX design	Figma, Miro, UI/UX, Wireframing, Prototyping
Principles & practices	REST API, Scrum, Responsive design, Accessibility (a11y)
AI	DeepSeek, OpenRouter – Integrating an AI agent into a web app

WORK EXPERIENCE

Full-stack Developer · Smartgis s.r.o. · part-time

04/2023 - 08/2026

- eDomovnice ecosystem: extending the existing web application with new features and independently building a mobile app from scratch based on the designed UI.
- Developing a public transport timetable mobile app for the city of Třebíč.
- Designing the mobile app's user interface in Figma.
- Working directly with the client on a large project: requirements analysis, designing the complete solution and delivering it.

Content Creator · Folklor bez hranic Ostrava · volunteer

06/2023 - present

- Creating content for the festival's Instagram: reels, photo reports and invitations from creative concept to publication.
- Filming, editing and post-production in CapCut, writing captions, presenting on camera.

SW Developer · TietoEVRY · part-time

07/2022 - 12/2022

- Developing web applications in ASP.NET (C#) and first steps with React.

Earlier experience

Barista, Cokafe (05/2019 – 07/2022): Working with customers and as part of a team.

Instructor & event organiser, Firemky s.r.o. (09/2016 – 05/2019): Coordinating teams of entertainers, communicating with organisers, training new team members.

EDUCATION

Master's degree (Mgr.) · Applied Computer Science, Software Development specialisation — 2024 - 01/2027
Palacký University Olomouc · State final exams passed. Thesis defence in January 2027.

Bachelor's degree (Bc.) · Information Technology — 2021 - 2024
Palacký University Olomouc

THESES & PROJECTS

A personal finance web app that supports financial literacy · Master's thesis
An application for managing personal finances that also helps users build financial literacy. Built with Next.js and Prisma, with an integrated AI agent.
Next.js, TypeScript, Prisma, AI agent, DeepSeek, OpenRouter

Web presentation of study plans · Bachelor's thesis
A web application presenting the study plans offered at Palacký University Olomouc. Besides displaying the plans clearly, it can generate promotional materials and adjust how the data is presented.
JavaScript, Node.js, Express, Tailwind CSS, Puppeteer · theses.cz/id/tww8zl/ohnoutkova_bp.pdf · github.com/BaruOhn/study_plans

Studio Opachová · Client project
A website for a beauty studio. I handled the whole process myself – from getting to know the client and their requirements, through the design, to the final build.
HTML, CSS, JavaScript · studio-opachova.cz

LANGUAGES & MORE

Spoken languages	Czech – native, English – fluent (C1)
Interests & more	Bouldering, Dancing, Reading, Driving licence (B)
